

Go **Green** with Neoflex!

Rose Brand's Neoflex is the perfect environmentally responsible linear lighting solution for architectural, signage or decorative applications. New Diffused RGB and Color Jacket Mini Neoflex give designers another dimension with color infused jackets and color changing linear lighting.

Neoflex has a long source life and high reliability, providing the latest advances in solid state lighting technologies. LEDs are up to four times more efficient than incandescent and halogen sources today and are unaffected by harsh conditions.

Rose Brand is committed to minimizing our environmental impact through the selection of products and throughout the life cycle of a product. LEDs contain no hazardous mercury, another benefit to the environment. **Go ▶**
